Pre-Class — Session 5 (Evaluate & Improve, and the Recorded Teach-Back)

~30 minutes. Nothing is due on the day of Session 5 — the build and the recording are due together two weeks after it.

Do this before Session 5

1. **Keep building** your one module with the production loop — complete version first, the practice derived from it. The floor is: a verified complete version · one practice · a pre-class study guide · one teaching-guide segment · a self-check. **The minimum that counts is one segment, complete** — its script and the complete version it narrates. Keep the AI-direction + verification log (template in your fill-in file).
2. **Read the guide, Section 9 (Evaluate & Improve)** and the closing section, **Teaching It Well**. Session 5 teaches §9 with your own recording as the first run.
3. **Read *Recording Your Teach-Back*** (one page, in your IN_CLASS packet) — what to record, how, and what to send.
4. **Bring your module folder as it stands, and your questions about the build.**

Come ready to

- Learn what you do after you teach a course for real — the four levels, the retro, the two AI jobs around it — and write your evaluate-and-improve plan (one of the rubric rows you tick for yourself).
- Hear the eight habits of *Teaching It Well* and pick two to try in your recording.
