

Pre-Class — Session 2 (Master Design Document)

~30 minutes.

Do this before Session 2

1. **Finish your Decisions doc and objectives** (Deliverable A) if you haven't.
2. **Read the guide, Section 3 (Seven Practices) and Section 3.5 (Decompose Into Modules).** Skim Section 4 (the MDD).
3. **Run the Seven-Practices audit on your own course** — use templates/Seven_Practices_Audit_TEMPLATE.md. For each practice, write your answer as a concrete feature. Where you have no answer, that's a gap to bring to class. **Do your own pass first**; then, if you like, put an LLM to work — ask it to *fill* the practices you blanked on (five candidate features each) and to *widen* (“what am I missing?”). Keep only what fits your audience and rewrite it in your voice. (*Unsure how to build a good feature? The guide's **Appendix D** has a craft note for each of the seven.*)
4. **Glance at a filled MDD** — 2_Worked_Examples/Coffee/04_MDD.md — to see the format.
5. **Pressure-test your objectives with AI** — the three prompts from Session 1, all on the **Directing AI** card: **CHECK** the four traps (“...or ‘none’. Do not rewrite them.”), **WIDEN** (“what do courses like this usually include that I haven't written?”), **SIMULATE** (“write three things a student might hand in as evidence they met it”). Bring anything it flagged that you *disagreed* with — those are usually the interesting ones.

Come ready to

- Share your objectives for feedback, and bring your practices audit (gaps included).
