Pre-Class — Session 5 (Teach-Back & Feedback)

Time varies — this is the build week (plan for ~6–10 focused hours).

Do this before Session 5

1. **Build your one complete module to the minimum-viable floor**, from the loop — a verified complete version, one scaffolded practice derived from it, a pre-class study guide, one teaching-guide segment, a self-check — in the module folder you laid out in Week 3. **Run the accessibility pass** (AI-8.1 to AI-8.4, or the one AI-8.3 sweep). Expect 6–10 focused hours.
2. **Run a Review Council review** on your module (personas: SME, student, instructional designer, professor) — as one chat prompt (Guide §10) or as four *separate* agents reading the module folder (Guide §6e, **AI-6.4**). Score it on consistency, delivery, factuality, and teaching principles; **revise** based on what it finds. Keep the **AI-direction + verification log** (template in your fill-in file) — what you asked for, what it got wrong or said it *could not verify*, how you caught and fixed it. **If you built with an agent**, do the second planted-error worksheet — *Catch the Agent's Report*, in your fill-in file — before you trust its report.
3. **Prepare a 10-minute teach-back** of ONE segment — teach it from your own teaching guide (floor or gold tier, your call).
4. **Re-read Rubric 5.3** (in your packet, *Rubrics*) — both halves: the artifact review of your folder (six *must* rows, including the log, access, and a short evaluate-&-improve plan you will write in class) and the live teach-back, where *portability* is the test: could someone teach your module from your guide alone?
5. **Read the guide, Section 9 (Evaluate & Improve)** and the closing section, **Teaching It Well**. Bring your module folder.

Come ready to

- Teach your 10 minutes, and give specific, kind feedback to your peers.
