Module Skeleton Map — TEMPLATE

Guide §5. One page per module, filled in Week 3, before anything is produced. Your MDD row says what the module contains; this map says what each piece becomes and where it lives. Model: the coffee course's Module 1 folder (`Coffee_Module1_filled.zip`) — every file named, three built to depth. Parts A–B start in class; C–D are the deep work, at your desk.

Module: [number and title] **Container slot:** [e.g. one 90-minute session] **Who teaches it:** [only me → floor · others → gold where needed]

A. From the MDD row

Module objectives (→CO#)	Evidence it builds toward	Named activities	Materials to build (`<Created>`)	Curated media

B. The file map — generic role → your file

Unzip `Module_Skeleton_TEMPLATE.zip` inside your course folder; it holds every role below as a one-line placeholder. Name each file in your own form, or cross the row out. **The list is a recommended default, not a checklist** — a 90-minute workshop uses far fewer than an eight-week course.

Package	Generic role (the template's name)	Your file — its form in your medium	Built from
Instructor	`deep_dives/background` — know more than you teach		
Instructor	`reference_solution/complete_solution` — the complete version		the module's evidence
Instructor	`reference_solution/solutions_and_key`		the complete version
Instructor	`self_check` — pass it yourself first		
Instructor	`quick_start/` — setup · pre/post-class emails · teaching-day checklist · files by segment		
Student · pre-class	`pre_class/data/` — what nothing runs without		
Student · pre-class	`pre_class/study_guide` + `warm_up`		curated media; the Activate / Motivate features
Student · live	`live_session/follow_along` — complete; students run it along with you		the complete version
Student · live	`live_session/practice_fillin` — the we-do		the complete version, decisions removed
Student · live	`live_session/cheat_sheet` + `glossary`		the Organize Knowledge feature
Student · guided	`guided_practice/guided_walkthrough` + `self_assessment`		
Student · post	`post_class/practice` + `quiz`		the Self-Directed feature; the key
Teaching Guide	`Teaching_Guide/minute_by_minute` — the agenda (part D)		

Package	Generic role (the template's name)	Your file — its form in your medium	Built from
Teaching Guide	`Teaching_Guide/segment_scripts` — one Teaching-Guide Segment template per gold segment		
Teaching Guide	`Teaching_Guide/deck_outline` — whatever the room will show		

C. The ramp — one rung per student-facing piece

Piece (from B)	Rung: I do · we do · you do	What is removed at this rung	How the student knows they got it right (feedback without grades)

D. The agenda sketch — Time / Activity / Details

First estimates from the Contact-Hour companion. The precise budget lands in Week 4, once the materials exist.

Time	Activity	Details	Tier (floor / gold)	Estimate

Fits the container? [fits · too big — what moves to pre- or post-class · too thin]

Access, planned: Represent — [ ] · Engage — [ ] · Show mastery — [ ]
